AUTOMATIC STAINLESS STEEL HAND DRYER

Model Number: HD-CL-X2500

Automatic Stainless Steel Hand Dryer

The energy required to operate a dryer is approximately 10% of the cost of paper towels. The following additional costs are eliminated: ordering, storing, replenishing, collecting and disposing of paper towels.

Hand Dryers protect you from the hazards of diseases, which can be transmitted by cloth towels or paper litter. In addition, they are easier for handicapped to use.

Hand Dryers Protect the Environment

A typical fast food restaurant uses 25 to 35 cases of 4,000 multi-fold paper towels annually.

The results are:

- 9 fully grown trees are cut down
- 453.6 kg of landfill waste is generated
(Paper towels can NOT be recycled)

Paper mills must cleanse the pulp with chemicals. A single treatment is capable of polluting 90,922 litres of water.

Paper towels can be made from recycled materials but cannot be recycled.

Features & Specifications:

- Fully Automatic - dryer is activated by an infrared sensor
- Maintenance free motor, capacitor initiated for quick starts.
- Vandal-proof - features include tamper-proof bolts and a side-mounted heating element inaccessible through air outlet.
- Satin finish stainless steel
- Power cut-off automatically in case of irregular use over 90 seconds.
- The nozzle revolves 360 degrees, allowing for face and hand drying.

Blowing volume: 270³m/h

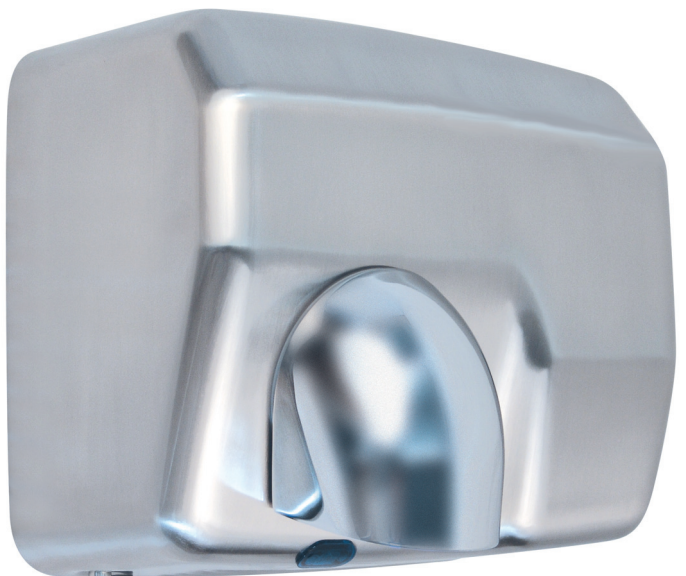

Air Speed: 30m/s

Quantity Recommendations

One dryer for every two washbowls is sufficient for most applications. If restroom traffic is unusually heavy, we suggest one dryer per washbowl in small installations, and two dryers for every three washbowls in larger installations.

Dimensions:

240mm (H) x 270mm (W) x 200 (D)

CHROME XLERATOR HAND DRYER

Model Number: HD-XL-0000

Chrome XLeator Hand Dryer

The energy required to operate a dryer is approximately 10% of the cost of paper towels. The following additional costs are eliminated: ordering, storing, replenishing, collecting and disposing of paper towels.

Hand Dryers protect you from the hazards of diseases, which can be transmitted by cloth towels or paper litter. In addition, they are easier for handicapped to use.

(Paper towels can NOT be recycled)

Paper mills must cleanse the pulp with chemicals. A single treatment is capable of polluting 90,922 litres of water.

Paper towels can be made from recycled materials but cannot be recycled.

Features & Specifications:

XLERATOR represents a 95% cost savings versus paper towels, eliminates paper towel maintenance, and creates a more hygienic restroom environment.

- Dries hands 3 TIMES FASTER (10 - 15 seconds)
- Uses 80% less energy than other conventional hand dryers
- Represents a 95% cost savings versus paper towels
- Helps qualify for LEED® Credits
- GreenSpec® Listed
- Improves Restroom Hygiene
- People actually LIKE to use it!
- Available enhancements include Custom Covers, 28mm Nozzle and Control Assembly

Power: 1500 W

Speed: 81m/s

Dimensions: 298mm (w) x 322mm (h) x 170mm (d)

Quantity Recommendations

One dryer for every two washbowls is sufficient for most applications. If restroom traffic is unusually heavy, we suggest one dryer per washbowl in small installations, and two dryers for every three washbowls in larger installations.
